

AMENDMENTS TO THE SPECIFICATION

Replace the section “**BRIEF DESCRIPTION OF THE DRAWINGS**” with the following:

BRIEF DESCRIPTION OF THE DRAWINGS

Similar reference characters denote corresponding features consistently throughout the drawings.

Figure 1 is seen to represent a school bus (showing) with the stop arm safety system and sequence of events and switch operation, which occur during the operation of the vehicle.

Figure 2 is seen to represent a block diagram showing sequence of (operation) operations of components of the advanced audio safety apparatus.

Figure 3 is (seen to show) seen to represent a dump truck with the water proof speaker mounted at top, a tailgate and a tailgate cylinder mounted at rear of the truck body showing the lifting operating conditions.

Figure 4 is (seen to show) seen to represent a transportation equipment having a cab with the advanced audio safety apparatus installed inside, a bed, and a transmission system, which activates a backup switch when engaged in a reverse motion. On top of the cab is (shown) seen a waterproof speaker (to output) responsive for outputting responses.

Figure 5 is seen to represent a circuit diagram of the present invention (showing) with components of the ignition switch, the data dictionary, the logic switch, the advanced audio safety apparatus, and the voice chip.

Figure 6 is seen to represent a transportation (bus) bus (091) (shown to relate) seen to emit voice auditory messages relating to the present invention.

Figure 7 is seen to represent a transportation vehicle having a waterproof speaker mounted at the tail light (021) and a waterproof speaker mounted at the mirror brackets (022).
